## Field Services

### Gas Services

With safety being our number one priority, Southern Cross provides a wide variety of gas services such as compliance leak survey, AC inspection and repair, meter exchanges and relights, regulator exchanges and much more.

### Electric Services

Southern Cross offers a broad range of services such as AMI/AMR meter deployment & smart grid services, meter reading services, stray voltage inspection, demand response installation and much more.

### Utility Locate & Mark Services

Using state-of-the-art equipment, Southern Cross provides accurate locating, mapping and scheduling for both single and multiple locating services. Our technicians are trained and prepared to perform locating services specific to client and utility needs.

### Water Services

Southern Cross offers a broad range of services such as water meter exchanges, meter locating, shut off/turn on, AMR/AMI/ERT installation, meter reading services and much more.

### Professional Services

The Spear Group - a sister company to Southern Cross specializes in engineering and estimating services, owner's representation, and project management and controls.
