## Why Southern Cross?

We have a proud reputation as an industry leader in field services, and have partnered with utilities across North America for seventy years, thanks to our excellent record of safety, quality and efficiency.

With our solid base of company organization and coordination, we can deploy qualified teams all over the continent to meet the needs of your projects safely and effectively.

With our 24/7 call center including a state of art work order and workforce management system and cloud based web portal, we can meet all your delivery schedules.

Southern Cross is your AMI/AMR deployment partner for electric, gas and water. We provide On time Delivery and scheduling with utmost Safety using our state of art web portal.

With our wide range of highly trained technicians and innovative technology, Southern Cross will make your next AMI/AMR project simpler, more efficient and safer.

## Electric Metering

### Stray Voltage Inspection

With safety being our number one priority, it is easy to see why you should trust Southern Cross with your visual and physical examination and testing of all utility sources.

### Meter Reading Services

Southern Cross can support manual and mobile reads as well as any ongoing meter maintenance.

### Demand Response

We can install demand response units residentially and commercially helping you avoid brownouts and outages.

### Smart Grid Deployment and Maintenance

Your company may be planning a substantial scale AMR/ AMI deployment. We will make your project simpler, more efficient and less expensive. Southern Cross can handle your Smart Grid rollout and provide maintenance services on your new meters as well.

### Innovative Technology

Southern Cross offers state of art work order and workforce management systems, including a web portal that allows for real-time visibility in productivity metrics and reporting.
